Systems Administrator | Network Engineer | Azure & Microsoft Infrastructure | Navy Veteran

PROFESSIONAL SUMMARY

Systems Administrator and IT Engineer with experience supporting Microsoft 365, Azure, Active Directory, Microsoft Entra ID, endpoint management, and network infrastructure across multi-tenant environments. Skilled in Windows Server administration, PowerShell automation, troubleshooting, and cloud technologies.

TECHNICAL SKILLS

Infrastructure: Windows Server 2022/2025, Active Directory, Group Policy, DNS, DHCP

Cloud: Azure, Microsoft 365, Microsoft Entra ID, RBAC, Conditional Access

Networking: TCP/IP, VLANs, Routing & Switching, VPNs, Subnetting

Automation: PowerShell, Python, Git, Terraform, Bicep

Platforms: Windows 10/11, Linux, Hyper-V, VirtualBox

PROFESSIONAL EXPERIENCE

IT Engineer | Rudick Innovation & Technology | 2025–Present

- Support Microsoft 365, Microsoft Entra ID, endpoint management, and cloud infrastructure across 68 client environments.
- Administer user accounts, group memberships, device compliance, and identity services.
- Troubleshoot workstation, server, network, and cloud-related issues.
- Maintain endpoint management, patching, and security solutions across approximately 2,600 endpoints.

IT Support Specialist | Sapphire Gas Solutions | 2023–2025

- Provided Tier 1 and Tier 2 technical support.
- Troubleshoot Windows workstations, user accounts, printers, connectivity, and software issues.
- Supported onboarding, access management, and endpoint administration.

Personnel Records & Administrative Specialist | United States Navy | 2016–2023

- Managed administrative operations supporting 300+ personnel.
- Developed SOPs and maintained sensitive personnel records.
- Coordinated audits, personnel actions, and records management.

TECHNICAL PROJECTS

Active Directory Enterprise Lab: Built Windows Server environment utilizing AD DS, DNS, DHCP, Group Policy, replication, and trust relationships.

Azure Hybrid Infrastructure Lab: Integrated on-prem AD with Microsoft Entra ID and Azure resources.

PowerShell Automation: Created a public 100 Days of PowerShell project featuring administrative automation scripts.

Networking Labs: Configured VLANs, routing, switching, subnetting, CAM table analysis, and TCP/IP troubleshooting.
